

# H-LINE

The H-Line engines are sturdy, reliable engines and are suitable for many applications, such as cabin boats, small fishing boats and larger canal boats. These engines have low noise and vibration levels due to their robust construction. They are also highly fuel efficient.

The H-Line engines are four-cylinder 4-stroke engines with an indirect fuel injection system, a dual-circuit cooling system with integrated heat exchanger and a seawater injected exhaust bend.

Available in two versions: VH4.65 and VH4.80.

## A few advantages of these engines

- Extremely favourable power to weight ratio
- Very low noise and vibration levels due to counter balancing shafts
- Very low fuel consumption
- Minimum hose connections, owing to extensive use of molded rubber cooling system components
- High alternator output as standard, developed for marine applications for fast recharging of the batteries
- Self-bleeding fuel system
- Readily accessible parts for easy maintenance

## Options

- The H-Line engines can be supplied with gearbox or saildrive
- Available as a power pack complete with hydraulic pump, when hydraulic power is needed for auxiliary components on board (see page 32)
